What Do I Need to Know About Affording My Medications?

Money and resources are almost always a concern for people in life. When serious illness is added on to the normal challenges of living, people can feel more distress. The reality of managing co-payments for prescriptions and less income can cause a loss in your sense of safety and control.

It is important to take medications as they are prescribed. If have financial concerns about being able to buy your medications, it is important that you talk with your doctor and reach out for help. Your doctor may be able to prescribe generic or less expensive medication brands and only the most necessary medicines that are shown to have proven value.

There are also resources that can help get or pay for the medications your doctor prescribes.

Take Action!

- Speak with your City of Hope Financial Counselor to get information about your insurance benefits, eligibility, authorizations.
