

THIRD ANNUAL
CANCER & AGING RESEARCH GROUP MEETING
CHICAGO, IL
SEPTEMBER 25-26, 2010

Kenneth E. Schmader, M.D.

Dr. Schmader is a Professor of Medicine at Duke University School of Medicine and Chief of the Division of Geriatrics. He is also the Director of the Durham Veterans Administration Medical Center's Geriatric Research, Education and Clinical Center (GRECC) and the Associate Chief of Staff for Geriatrics and Extended Care. He earned his medical degree from Wake Forest University School of Medicine, Winston-Salem, NC, completed an internal medicine residency and Chief Residency at the University of Wisconsin, and Fellowship in Geriatric Medicine at Duke University and Durham VA Medical Centers.

Dr. Schmader's area of research is herpes zoster and postherpetic neuralgia (PHN), vaccines, and drug use in older adults. He conducts pre-clinical, clinical trials and observational studies of herpes zoster, influenza, pneumococcal vaccines and infections funded by grants from the National Institute on Aging (NIA), National Institute of Allergy and Infectious Diseases (NIAID), VA Office of Research and Development, Hartford Foundation and Industry sources. He is a lead investigator of the VA Cooperative Trial of the herpes zoster vaccine in older adults, known as the Shingles Prevention Study. He also conducts research on optimal medication use, adverse drug reactions and pharmacoepidemiology in older adults.
