
THIRD ANNUAL
CANCER & AGING RESEARCH GROUP MEETING
CHICAGO, IL
SEPTEMBER 25-26, 2010

Richard Stone, M.D.

Richard Stone, MD, is the Director of the Adult Acute Leukemia Program at Dana-Farber and Professor of Medicine at Harvard Medical School. A physician-scientist, Stone is nationally recognized for his laboratory and clinical research concerning blood and bone marrow malignancies including acute leukemia, myeloproliferative disorders and myelodysplastic syndrome [MDS] (a bone marrow failure state that may convert to leukemia). In addition to his work at Dana-Farber, Stone serves as a member of the Medical Oncology Board of the American Board of Internal Medicine, Chair of the Medical Board of the International Aplastic Anemia and MDS Foundation, Co-Chair of the National Cancer Institute's Sub-Committee H grant review panel for cancer cooperative trial groups, and Vice-Chair of the Leukemia Core Committee for the national cooperative trials group Cancer and Leukemia Group B. Stone earned his medical degree from Harvard Medical School in 1981. He completed his internal medicine residency training at Brigham and Women's Hospital, and his hematology oncology fellowship at Dana-Farber
