

PROVIDING A VOICE FOR PATIENTS WORLDWIDE

FACITtrans
Certified Translation

This is to certify that the Geriatric Assessment Patient Questionnaire and Healthcare Professional Questionnaire (with the exception of the Mini-Cog™) was translated from English to Traditional Chinese by qualified translators under contract to this institution. All translation steps are documented in the Traditional Chinese Item History which is available upon request. After the translation phase was completed, the Geriatric Assessment Patient Questionnaire was linguistically validated by testing with participants to confirm the suitability of the translations for Traditional Chinese patients. All translation work was performed by members of the Traditional Chinese translation team to the best of their abilities as natives of Traditional Chinese and as translators and researchers experienced in the field of health-related quality of life survey research under the direction of the undersigned. The translations are, to the best of my knowledge, accurate translations of the corresponding original documents.
